

elipson® | Chroma 200

TURNTABLE

An elegant, easy-to-use
and above all musical
turntable.

The Elipson Chroma 200 is a belt-driven manual turntable with an elegant design, benefiting from our latest electronic and mechanical technologies.

Assembled in France in our premises, the Elipson Chroma 200 offers the characteristics that contributed to the success of the Alpha models such as the OTT (Orbital Torsion Tonearm) tonearm in aluminum, its digital processing system of the motor rotation.

It is distinguished by a new axis system for an even more precise rotation, an improved drive motor with optimized damping, a graduated counterweight, as well as by the addition of a cue control lever for your comfort of use.
