

STUDIOART

Music is a matter of taste.
Sound is not.

REVOX
Studio Sound Quality

MUSIC IS A MATTER OF TASTE. SOUND IS NOT.

Record, store, play back

The ones who have had a lasting impact on these three disciplines may rightly call themselves media pioneers. Revox is such a company.

From A for Abba to Z for Zappa: For over seven decades, the traditional Swiss brand Revox has set the standards worldwide for studio recordings of the most famous artists in all musical genres.

The Revox standard was, is and remains to reproduce music at home as close as possible to the recording in the studio – as direct, as powerful and as lively as the original.

Revox – loosely translated it means «the resounding voice»: The name alone is enough to describe the high standard of reproducing even the most complex and multi-faceted of all sound sources, the voice, true to the original and across all frequencies.

The STUDIOART Series

With the **STUDIOART** Series, the Revox developers have created a new, innovative product category in the Wi-Fi / Bluetooth / network loudspeaker segment. Each of these very compact loudspeakers is a special masterpiece and impresses with its true studio sound quality.

«... WITH THE NEW STUDIOART SERIES, REVOX HAS CREATED THE IDEAL COMBINATION OF MOBILE AND STATIONARY MUSIC REPRODUCTION. THE POSSIBILITIES ARE ALMOST INFINITE, OPERATION IS SUPER EASY AND THE DESIGN IS ELEGANT AND APPEALING. ... THESE ATTRIBUTES ARE COMPLEMENTED BY THE EXCELLENT SOUND ...»

LITE MAGAZIN 2019

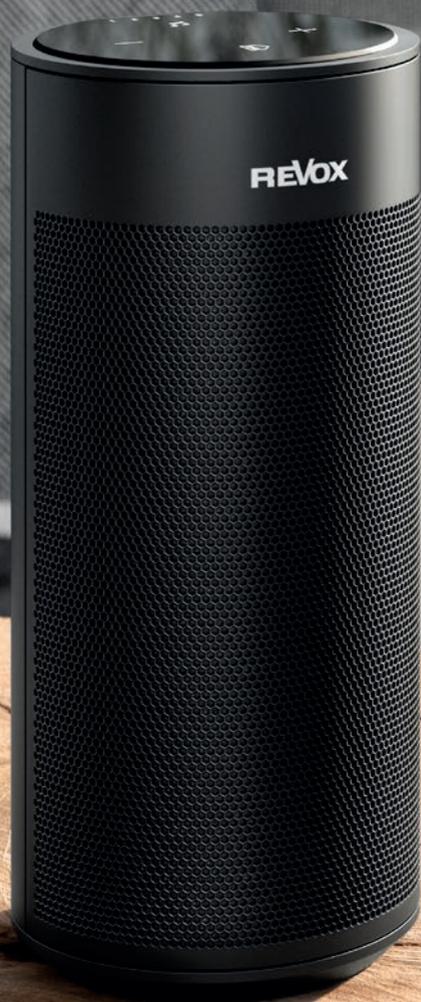

«... BUT ITS ALL IN THE SOUND. ALMOST 50 YEARS OF EXPERIENCE WITH ENGINEERING LOUDSPEAKERS DO THE TRICK. REPRODUCTION IS REFINED, YET VOLUMINOUS, EVEN AT LOW VOLUMES AND FREE FROM SHOW-OFF EFFECTS...»

HIFI TEST 04/2019

True studio sound quality

With **STUDIOART** you hear music as it was recorded by the musicians in the studio – in true studio sound quality. The sound reproduction is natural, harmonious and free from show-off effects. The high-end sound is refined and yet voluminous for a pure and transparent tonal balance.

Easy operability

The unique Revox operating system offers its owner maximum functionality and design freedom with minimum operating effort. All **STUDIOART** products can be easily operated via the touch display on the high-quality glass surface or via the Revox app (iOS and Android – free of charge in the app store). With five presets, favourite radio stations can be called up quickly and conveniently.

Quality and sustainability

Every Revox product is a special masterpiece. Highest technical precision and uncompromising quality, in every component just as in the perfectly harmonised interaction of all high-quality components, ensure immersive studio sound quality at any time and in any place.

Sustainability plays a decisive role at Revox. It implies that Revox products are developed so that they remain compatible with the latest product range, even after a very long time. And that maintenance and repairs can still be carried out after many years.

Design

The design standards of Revox are just as high as those of technical quality: timeless, elegant, excellent. The red dot award from 2019 confirms our principle:

The jury constitutes: «The slim, clean shape of the loudspeaker fits perfectly into a modern interior and has the advantage that it reproduces sound to fill the room».

STUDIOART S100 AUDIOBAR

HDTV FOR YOUR EARS.

Silent sound technology: The perfect sound experience even at low volumes

The Revox **STUDIOART** audiobar clearly plays in a league of its own. While conventional soundbars merely amplify effects and sounds from movies or TV programs, the Revox audiobar is designed for TV/home cinema and music. Innovative technologies enable an impressive sound experience both at normal and concert or cinema volume while at the same time offering excellent speech intelligibility. Its silent sound technology uses specially developed algorithms to ensure full tonal balance that is harmonious, clear and voluminous even at low volumes. No matter what the volume, you always hear all the subtleties and details across the entire acoustic spectrum.

«THE REVOX AUDIOBAR NOT ONLY CONVINCES WITH TV AND HOME CINEMA, BUT ALSO WITH MUSIC, EVEN AT LOW VOLUME. BECAUSE THE SILENT SOUND TECHNOLOGY ENABLES A COMPLETE SOUND EXPERIENCE ACROSS THE ENTIRE FREQUENCY SPECTRUM. THIS IS HDTV FOR THE EARS.»

JÜRGEN IMANDT, HEAD OF MARKETING AT REVOX

**«THE REVOX AUDIOBAR DELIVERS
POWERFUL AND HARMONIOUS
SOUND PAIRED WITH EXCELLENT
SPEECH INTELLIGIBILITY.»**

JÜRGEN LINDEMANN, DEVELOPER AT REVOX

STUDIOART S100 AUDIOBAR

A completely new dimension

Unlike any other. The Revox audiobar is an active 3.1 loudspeaker with highest reproduction quality of up to 192 kHz/24 bit and is not only convincing as a TV/home cinema system but also as an independent music system. Seven high-end loudspeaker chassis – three full-range chassis in a left | centre | right arrangement and four bass chassis – combined with seven low-noise audio amplifiers and the integrated dual-port bass reflex technology ensure an impressive sound experience and excellent speech intelligibility. And all this at any volume – even when the speakers are turned down. With a total output of 210 watts and a maximum sound pressure of 100dB/1m, it delivers enough power to enjoy concert and cinema volume even in large rooms. The S100 offers a variety of possible sources and connections. Music can be played via WiFi, Bluetooth (transmitter and receiver such as for Bluetooth wireless headphones) and AirPlay 2. Three HDMI 2.0 with 4K support, a TV (HDMI 2.0 ARC) and other ports allow you to connect your TV and various other sources. And you can also use it for streaming your own music collection as well as iRadio and other music services.

The S100 is optionally operated with the handy remote control, the touch elements directly on the glass surface of the audiobar or via the free **STUDIOART** app.

It can be easily combined with other **STUDIOART** products as a 5.1 system via a wireless radio connection (KleerNet™) and can also be expanded as a multiroom system via wireless or wired LAN, thanks to AirPlay 2 even across manufacturers.

STUDIO SOUND QUALITY

Music is a matter of taste – Sound is not

With Revox **STUDIOART**, you choose true studio sound quality, guaranteed by high-quality materials, innovative technologies and the highest level of manufacturing precision. These special characteristics are resembled, for example, in the high-quality high-end chassis. The challenge for Revox developers: engineering a compact loudspeaker with harmonious, spatial sound and excellent reproduction – even at low volumes.

STUDIOART A100 Room Speaker

**Studio sound
quality**

Sometimes the A100 is a solo artist, sometimes it is a band leader with its fellow players P100, B100 and S100. Thanks to its built-in rechargeable battery, it delivers seven hours of music enjoyment. It plays studio sound quality via WiFi, LAN, Bluetooth and AirPlay 2. It understands your music collection, but also iRadio, Spotify, Tidal and Deezer.

STUDIOART P100 Room Speaker

**For first-class stereo
sound**

The P100 Room Speaker is the tailor-made and wired addition to the active speaker A100. An excellent passive speaker, it plays big and enriches your sound world with a perfect stereo experience.

STUDIOART B100 Bass Module

**Full bass foundation
power**

The B100 subwoofer is the perfect partner for the A100, P100 and S100 if you want even more impressive bass reproduction. The innovative chassis and downfire principle (floor for reflection) make it possible. Wireless connection to other **STUDIOART** loudspeakers

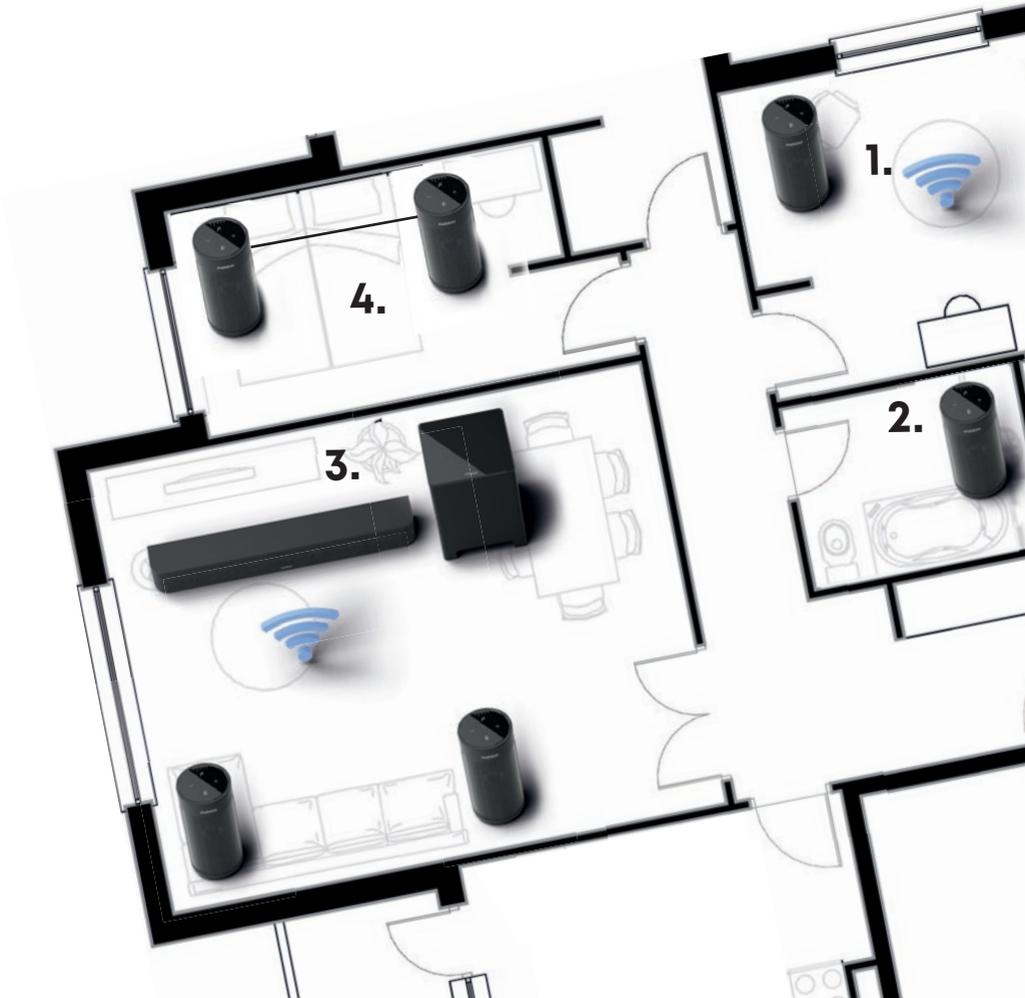

**TRUE STUDIO SOUND QUALITY
WHEREVER YOU WANT. WITH
7 HOURS BATTERY LIFE ALSO
OUTDOORS AND ON THE GO.**

TRUE STUDIO SOUND QUALITY THROUGHOUT YOUR HOME.

FROM THE INVENTOR OF MULTI-ROOM SYSTEMS.

ENTER AT THE TOP, EXPAND ON A HIGH LEVEL.

Possible combinations of STUDIOART products

A Revox **STUDIOART** system grows with your demands – if you wish, into every room in your home. The number of possible combinations is virtually endless.

With the Revox **STUDIOART** multi-room system, you enjoy all integrated sources throughout your home, in the configuration and place of your choice. Extremely convenient for controlling your **STUDIOART** system: the clearly structured and very easy to operate Revox **STUDIOART** app (IOS or Android) – free of charge in the app store.

INSTALLATION EXAMPLES

1. A100 for wireless stereo

Two A100 as a wireless set for excellent stereo sound – anywhere in the room.

2. A100 wireless

One A100, for example in the bathroom, for very impressive sound.

3. S100 Audiobar

S100 in combination with two A100 and one B100 for 5.1 home entertainment with impactful bass experience.

4. A100 paired with P100

A100 as a set with P100 – connected by a speaker cable to form a stereo combination.

KleerNet™

For the wireless, highly reliable connection with other **STUDIOART** loudspeakers in a room.

WLAN / LAN

For the connection of **STUDIOART** loudspeakers in one or several rooms.

TECHNISCHE DATEN
